In spite of the trouble they put me to I must confess the Austrians are a splendid INNSBRUCK, Austria, May to

the Austrian and Swiss Alps I alighted from THE ART OF RIFLE SHOOTING.

I believe that the great majority of these men would be glad of the opportunity to keep on more familiar terms with their rifles during the unconscionably long periods between the hunting seasons, not only because such familiarity is a highly important powder and slaughter lifeless clay, but the rifleman's infinitely finer art is probably itself into a question of who has the stronger i day.

"J. G. H." echoes Mr. Hamilton's warning that the growing disuse of the rifle means if they were not a bit disquieting. One need not be accused of being a calamity howler because he is disturbed by official records which show, according to Mr. Hamilton, that in 1910 17,473 out of 29,230 members of the regular army, and 20,630 out of 51,749 militiamen, failed to qualify even as markemen, the lowest of the three grades, while 40,000 militiamen had no range practice at all! What kind of defence or attack could such troops make, especially the modern high fower rifle?

But it is in rifle shooting for itself that many of us are keenly interested, though | world. may be borne in mind that, as the hunters would probably make use on the range of their hunting rifles, a good deal would be added to the country's available fight ing strength, since many of the sporting reapons have virtually the same mecha nism as the military arm, that is, the bol action. However, as a means of cultivating control of the nervous system nothing perhaps is superior to the intelligent and persistent use of a rifle. This is proved by the fact that many constitutionally nervous persons become first rate shots.

BROOKLYN, May 24. Education at High Pressure To THE EDITOR OF THE SUN-Sir: The other day a high school girl of my acquaint ance, perhaps sixteen years old, accosted

me as presumably a person of some school ng and emitted a Macedonian cry for as sistance upon the following list of questions 1. Classify the chief human occupations under five groups and give an example of each 2. Give a description of the probable effects of

the completed Panama Canal on the trade of ta States 3. In what way did the invention of the Besse

4. Discuss the advantages of the control of interstate transportation by the national Govern-

industries has there been presented a demand for tariff review? Why?

6. What are the relative advantages of electricity and steam as motor power for ratiways Explain fully 7. What physiographic conditions of the north-

& In what respects are the British and the Gerernment tried to stimulate commerce Explain

fully.

10. What is the largest export from Chile and this prontable trade possible.

11. In what respect were the terms of the treaty

12. Compare industrial conditions in the South-I think you will agree with me that there many of them magnificent examples and writer in each of these questions if he How was I appailed to learn from my little friend that she was expected to bring in the answers and the "full explanations at half past eight next morning, she being then list was all from one teacher But there ike "A character sketch of Marcus Brutus." an "Outline of the history of the two triumvirates," and a "Life of James Fenimore These were all to be done in the other avocations being provided for school

And mind you these twelve questions did not pertain to a review of anything the pupils had had in text book or lecture. They were to be answered from the knowl side of school hours.

After a year or two of this monstrous nonsense what can that girl possibly know about anything? OLD FOGY. NEW ROCHELLE, May 24

The Bottest and the Coldest State. f fourteen years it has been discovered that the

average temperature of the United States is 52.9 degrees Fahrenheit, and the annual amount 32.0 degrees Fahrenheit, and the annual amount of rainfall is 1,30% cubic miles. The State of Arizona had the lowest amount f annual precipitation, 5.8 inches, of any State during the fourteen years which extended from 1891 to 1904 inclusive. Alabama had the greatest amount of rainfall. 71.6 Inches. The State having the lowest average temperature was North Dakota, 35.5 degrees, had the highest temperature, 71.8 degrees,

No Road.

No road for me, but just the open mo-Where the great winds and the wide skies allure By day the striding sun, and then by night The white stars matching up and down the height

No road for me, but, springy under foot, where he told the proprietor the reason. The velvet grasses and the bracken shoot, for my visit to their "fair city," and after The kingcup's gold, the flush of wild briar bloom announcing that he would call for me at The tansy's tang, the balsam's keen perfume.

No road for me, but climbing crests that lead Onward and upward like some noble deed To far horizons looking out on life. Above its moil, above its strain and strife. Whate'er the hour and whatene'er the tide

Frost time or flower time; if it cheer or chide. ngyved, untrammelled, fetterless and free

CLINTON SCOLLARD. Brief Graduation Ode. Scalps.

Mrs. Wharton's and Mr. Galsworthy's serials are continued, there are two short stories and three poems. In well illustrated articles C. E. Freeston

# TRIBUTE TO MORGAN

Museum Will Call Rooms Cogtaining Gifts of Gems the "Morgan Halls."

BEST KNOWN COLLECTION

President Osborn in the "Museum Journal" Makes Public the List.

As a tribute to the late J. Pierp Morgan, one of the founders American Museum of Natural IIIs and one of its greatest benefactors, planned to perpetuate his memory naming the halls containing the gen and precious stones presented to the stitution by Mr. Morgan the "Morga Halls."

The extent of Mr. Morgan's gifts to the museum and his liberal contributions to the endowment fund, covering a period of forty-four years, are enumerated for the first time by President Henry Fairfield Osborn of the institution in the current number of the

Jesup's great administration." President Osborn, "and was second only to Mr. Jesup as a benefactor of the mi seum. His interest was extended to the museum as a whole, as shown by contributions of \$25,000 to the endor ment in 1890 and of \$300,000 in 1904 His love of the beautiful led Mr. Morgan to take special interest in the collections of minerals and gems.

In the list of gifts mentioned by i'res dent Osborn are: The great boulder of tade from New Zealand, the Bement co lections of minerals and meteorites, the ohn Warren Collins collection, includ ing the Warren mastodon, and Charle R. Knight's restoration of extinct an mals, reproductions of which are found in many of the museums of the ol

The Garces collection, given by Mr Morgan, come from the prehistoric sites of the islands of Lake Titicaca, Peru and Copacabana, Bolivia. It numbers about 500 objects of beautiful design in gold, silver, copper and bronze, Lenders Indian collection numbers more than 1,200 pieces and contains many of and rare examples of Indian costumes beads, shields, ornamental pipes and weapons.

One of his unique gifts is that of the ancient miner, known as the thi ear mummy, wonderfully preserved w. copper salts.

Several months before his death M Morgan presented to the museum a ection of precious and semi-precio stones. Honorary Curator of Ger George Frederick Kunz has made stones. stimate of the Morgan collection

gems installed in the museum and say "The two collections as eventual completed consist of 2,176 specimes of gem stones and 2.442 pearls. Tak in its entirety the present collection the most extensive and carefully s ected display of rough and cut stone

"The collection is especially remark ble for the many unique things it com tains, among which are the near perfect large gamphire known a Rail onian axe head of banded agate. .. years old, and a wonderful series sapphires of blue, pink, salmon and of beryls, a large series of tourms entire boulder, but so thin that it meas ures not more than one-eighth of an nch through. The great hyacinth with the portrait of Christ on it, a gift of

Vatican Cardinal to a friend, is in the "Magnificent cut epecimens of morganite must also be noted, as well as a nass of quite transparent aquamarin the heart of the great crystal found at Marambaya, Brazil. It is the largest piece of gem beryl known. The sap-phire collection numbers 166 specimens,

"No single specimen is of greater importance from an archeological point of view than the ancient are head of handed agate. This was obtained Cardinal Borgia. It was offered by the Countess Ettore Borgia to the British Museum, but was eventually acquired by Count Michael Tyskiewicz for 15,000 france.

"Very notable is the great Persian turquoise engraved with 2,000 words, an entire chapter of the Koran. There turquoise matrix from Persia, a hone turquoise from France and a magnificent turquoise from Los Carrillos, N. M." of the fournal published by the museum s designed from objects of antiquity and historic value in the Morgan gen collection. Babylonian cylinders dat-

CORTLANDT STREET NOT CITY'S. Justice Greenbaum Decides That It In Private Property.

ing from 4,000 to 400 B. C. are combined

n the border

From Form and Fireside.

Supreme Court Justice Greenbaum cided yesterday that the title to Cortia street belongs to the abutting proper owners and that the city of New Ye has only an easement for street poses. The court accordingly holds property owners who have construents underneath the sidewalk at using space belonging to the city they are not required to take o license from the city for that purpose The question arose in a suit over vault space at the northwest corner

cide the question of the title to the space underneath the sides Justice Greenbaum examined records. He found that owners erty between Broadway and the it River petitioned the City Founcil for permission to lay out a street fort feet wide through their land, and this wa done. After the great fire of 1784 the Council decided that the safety of the required a widening of the streets in the burned district, and Cortlandt street was widened five feet on each side.

The city will appeal from Justice

Greenbaum's ruling. FIRST PENNSYLVANIA RECALL.

Socialist Constable Resigns by Agreement With His Party. COUDERSPORT, Pa., May 24 .- The first ctual demonstration of the recall

ciple in practice in this State is furnished by the Socialists of Roulette. In Scribner's Magazine for June Senator Lodge tells of some great men he has known, while the C. E. Norton letters are about English friends.

Mrs. Wharton's and Mr. Galamouthy's account to realign when a magazine to record when J. P. Hall was reominated and elected constable by the Socialist party he signed a resignation in blank and an agreement to realign when a magazine are some controlled. agreement to resign when a majority his party demanded. By unanimous the party is said to have demanded that Hall resign. Hall recognized it. appointed Charles Judge Ormored, who app Knowiton to succeed him.
